**DETAILED ACTION**

***Notice to Applicant***

1. Claims 30-32 have been examined. Claims 1-29 have been withdrawn.

***Election/Restrictions***

2. Claims 1-29 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 07/05/2007.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Koenig (US Pat# 7,167,855).

A. As per claims 30-32 (as represented by exemplary claim 30), Koenig teaches an information supply system comprising a server connected to a network and a terminal device which requests said server for information over said network, wherein said

Art Unit: 3694

server transmits ranked information numeric vales of specified information and a weighting entered from said terminal device to said terminal device according to a request from said terminal device, said information supply system comprising; means for displaying information having the highest score of said ranked information and other information on a display window of said terminal device, said displayed information being arranged to be centered by said information having the highest score, means for displaying a difference between scores of said information having the highest score and other information on a display screen of said terminal device as a distance from the center, and means for displaying information while changing a distance from information located on the center in relation with a change of said weighting transmitted from said terminal device and a distance from said center (Koenig: abstract; col 5, ln 65 to col 6, ln 10; col 18, lns 19-28; col 20, lns 24-49; col 21, lns 15-67).

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited but not applied art teaches systems for ranking data using weighted averages.
